WORK EXPERIENCE

◆ PROFILE: ASSOCIATE SOFTWARE ENGINEER

COMPANY: TECHAHEAD PVT LTD (NOIDA, UTTAR PRADESH)

... 04/2022 - PRESENT

- I am working as a MEAN Stack Developer.

- Working on multiple different domain applications i.e., e-commerce, IOT application and many more.

◆ PROJECT: COLD PLUNGE MOBILE APPLICATION (IOT PROJECT)

DURATION: NOV, 2022 - PRESENT

PROJECT DESCRIPTION: It is a IOT project where we used to connect physical IOT devices with their mobile application. In this project I am working as Backend Node Developer and also providing support to team as a Frontend Angular Developer for its Admin Portal. We are using AWS IOT Core service for registering IOT devices and collecting the data for our application.

◆ PROJECT: BOXLTY MOBILE APPLICATION

DURATION: APR, 2022 - PRESENT

PROJECT DESCRIPTION: It is also a property listing application for renting and buying the properties of US. In this project I am working as Backend Node Developer and also providing support to team as a Frontend Angular Developer for its Admin Portal. I am using MySQL for Database and AWS Serverless Architecture for deployment.

PERSONAL PROJECTS

◆ TITLE: SCHOOL BUS TRACKING SYSTEM

IDE USED: Android Studio

TECHNOLOGY STACK: Java, XML, Firebase, Google Maps API

PROJECT DESCRIPTION: Parents track the location of bus so that they can track their child live location and estimate time to reach the destination (School / Home).

- Easy for school to maintain school bus students' data, bus data and bus attendants' data. Bus attendant can see route and students pick/drop point.

◆ TITLE: AI CHAT HELPER

IDE USED: Visual Studio Code

TECHNOLOGY STACK: AngularJS, OPEN AI, HTML, CSS

PROJECT DESCRIPTION: This software enables to understand and respond to queries with unparalleled accuracy. Whether you need information, assistance, or simply want to engage in a conversation, AI Chat helper is helps to make interaction effortless and enjoyable.
